The figures exceed by almost \$3,000,000 the total for the pravious week and show an increase of \$5,222,600 over the same week of 1918. To this important factor and increased offerings of cotton and grain bills were attributed the diminshed activity in the foreign exchanges at lower rates. The approach of the final quarter of the year, with its interest and dividend requirements, was primarily responsible for the withdrawal of much money recently offered in this market. The supplytoday was small, with a falling off in demand for commercial paper, except by interior banks.
